

MAKE YOUR NETWORK HAPPEN

DO YOU QUALIFY?

The Millennium Infrastructure Fund seeks network owners with a track record for successfully building and operating broadband networks. Some networks have been awarded Local, State, or Federal grants to build areas and drive growth in the community, but federal funding is not a requirement. We invest with network owners with a combination of quality management, proven infrastructure models, or grants and help them achieve their network growth.

You've got big plans for your network. We connect you with accredited investors to provide up-front capital so your broadband construction stays on track.

This is where the future starts. This is your opportunity to beat your competition to market and take a leadership role in the future-proofing of America's broadband infrastructure.

“ Uplink LLC, a small ISP operating in Mississippi, has been fortunate to receive multiple substantial federal grants aimed at expanding broadband infrastructure in rural areas of the state. However, these grants follow a reimbursement principle, requiring us to initially invest the funds and then seek reimbursement within a 60-day period. We extensively explored various financial institutions and organizations to secure a line of credit specifically for this purpose. Thankfully, Millennium Infrastructure Fund was the only entity that truly grasped the importance of such credit in facilitating our business operations and making a significant impact on our rural community. Without this crucial funding, Uplink would have faced severe limitations in terms of deployment speed and the overall positive influence we could exert. Millennium played a pivotal role in financing our aspirations and enabling us to turn them into reality. ”

– Brian Smith • CEO, Uplink, LLC

CONNECT CUSTOMERS FASTER

The Millennium Infrastructure Fund can help you secure the funding to build a state-of-the-art fiber optic network that delivers a superior online experience to your customers.

- Apply for a secure, 3- to 5-year interest-only bridge loan to quickly and efficiently build before your competitors.
- Leverage the experience of an industry-leading partner that can also provide you with training, engineering, and materials to seamlessly complete your project.
